Subject: RE: UIC Class III area permits

Yes. It's OK to share internally within EPA. We have released this info for public comment. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

Thanks for asking!

Thanks and I'll do a quick read. Do you think it's OK to share that file for now?

Hi Bruce and Wendy,

Here is the CEA for Dewey-Burdock.

This is what I say about the scope relative to the NEPA process:

The scope of this analysis is similar to the NRC analysis included in SEIS Section 4, *Environmental Impacts of Construction, Operations, Aquifer Restoration, and Decommissioning Activities and Mitigative Actions*, which evaluates the potential impacts from the proposed project. In contrast, SEIS Section 5, *Cumulative Impacts*, considers the impacts of other past, present, and reasonably foreseeable future actions in addition to the proposed project impacts. The other actions evaluated include other uranium recovery sites, coal mining, oil and gas production, wind power, transportation projects and other mining activities. The purpose of this cumulative effects analysis is to consider the effects of the drilling and operation of the multiple injection wells authorized under the two UIC Area Permits.

Valois,

Sorry for distraction, but can you share what you have with Bruce on cumulative effects? I know you spent a good chunk of your life addressing this for DB.

Thanks, Wendy
